TEKGROUP MANUFACTURING

INNOVATE | MANUFACTURE | STOCK | DELIVER

# Introducing...

## TEKGROUP MANUFACTURING

We can provide a full range of thermal and acoustic solutions for your customers, as well as bespoke cut strips and routed boards increasing their productivity and minimising waste. For total flexibility, products can be delivered to your stock or site.

### FABRICATION SERVICES

We work with customers to supply fabricated bespoke solutions to suit site requirements.

We can provide the following services:

- ✓ Cutting
- ✓ Machining
- ✓ Lamination
- ✓ Assembly
- ✓ Development

### OUR PRODUCT SOLUTIONS

#### Drylining Solutions

Pre-cut plasterboard strips designed to save customers time, money and waste.

#### Ceiling Solutions

We manufacture a range of products, designed to meet thermal, acoustic and fire requirements within any ceiling system.

#### Thermal Laminates

We work with the leading manufacturers of insulation and gypsum board products, meaning we can provide our customers with bespoke laminated boards to suit any project requirement.

#### Underfloor Heating Boards

We produce a range of gridded and routed boards, designed to allow for faster and more efficient installation of the underfloor heating pipes and to efficiently transfer heat throughout the room.

#### Converted Options

We manufacture a wide range of faced and encapsulated glass and stone wool roll and slab products.

We also offer additional core materials such as Class 0 foams, PE foams, phenolic and PIR boards, and industrial felts to provide additional fire, acoustic and thermal solutions.

### SPECIALIST LOGISTICS

We can deliver to stock or direct to site with rigid vehicles and mechanical offload available at no extra cost.

We have developed our logistic solutions to work around you. So, whether you need a delivery to central London, in the middle of the night, or require specialist offload equipment, we will work with you to find a solution to your challenges.

FOCUS ON:

## OUR CUTTING SERVICE

1

### Improved Efficiency

Offsite cutting ensures boards are cut to precise measurements in a controlled environment using specialist machinery to cut multiple boards at once, rather than onsite using hand tools to cut boards individually.

2

### Reduced Waste

Boards are delivered direct to site pre-cut to size, in the exact quantities needed, reducing the amount of waste produced during the installation process.

3

### Enhanced Safety

Drywall cutting can produce a lot of dust, which can be harmful to workers and create a hazardous work environment. Offsite cutting reduces the amount of dust produced and can help to improve safety on the job site.

4

### Improved Quality

Offsite cutting allows for more precise measurements and clean cuts, which results in a higher quality finished product.

5

### Cost Savings

Offsite cutting can be more cost-effective than onsite cutting, as it can reduce the amount of time and labor required to complete the project. This results in cost savings for both the contractor and the end customer.

# What material do we cut?

- ✓ Plasterboard
- ✓ Glassroc
- ✓ Plywood
- ✓ Cement Particle Board
- ✓ Insulation

## FROM LEADING MANUFACTURERS

# OUR DRYLINING SOLUTIONS...

## DEFLECTION HEADS

We provide pre-made deflection heads, manufactured specific to your requirements, to be used within any plasterboard partition to allow for movement within the structure.

## PATTRESSES

We provide ready prepared custom cut pattress boards designed to provide support for fixtures and fittings for plasterboard walls and ceilings.

## V-CUTS

We provide v-cut plasterboard for simple beam or column encasements through to complex curves. We work with you to design and fabricate plasterboard to allow it to fold to form any shape, speeding up installation on complicated projects.

## BAFFLE BOXES

We provide pre cut and essembled baffle boxes, constructed specifically to suit site requirements for use in both walls and ceilings.

## PLASTERBOARD STRIPS

We provide clean and accurate pre-cut plasterboard strips, manufactured to suit your specifications, direct to site in the exact quantity you require.

TEKGROUP

Your specialist solutions provider.
